

### Calculator Requirement:

Students taking Algebra II or higher are required to have a TI-Nspire graphing calculator, either CX or CAS (see below for more information on what version might best fit your child). Students who plan to take AP Calculus should purchase the CAS version. *The TI-Nspire is not required for Algebra I or Geometry.*

	<i>Accepted on SAT</i>	<i>Accepted on ACT</i>	<i>Accepted on AP</i>
<i>TI-Nspire CX</i>	YES	YES	YES
<i>TI-Nspire CX CAS</i>	YES	<b>NO</b>	YES
<i>TI-Nspire CX II**</i>	YES	YES	YES
<i>TI-Nspire CX II CAS**</i>	YES	<b>NO</b>	YES

\*\* = Available for purchase at the Bookstore

The functionality and appearance of these four calculators are roughly all the same. We do want to bring to your attention that **CAS versions are not permitted on the ACT**. Should the ACT be in your future, we suggest you purchase a TI-Nspire without CAS. All four of these calculators are used at Berkshire School. *When purchasing, please retain the student software license number that comes in the package as this is the only way to access the free software without having to purchase a separate license.*

For questions, please contact Mathematics Department Chair Sylvia Gappa at [sgappa@berkshireschool.org](mailto:sgappa@berkshireschool.org). Please click [here](#) to see what skills/concepts students should review over the summer for their upcoming math class.
